creates confidence

## Professional Services and Capabilities

"I had a great feeling about your performance from Day 1 and it was confirmed over and over throughout the project. I am highly pleased with the effort and with your personal interaction, the quality of work, and the great presentation skills displayed."

**-Metro4/SESARM**

Cardno ATC is a national leader specializing in environmental consulting, geotechnical engineering, construction materials testing and building sciences.

**Cardno ATC** is a large, robust firm with the expertise to handle any challenge and the speed to meet it quickly. We've met many of the industry's toughest challenges for many of the nation's most demanding clients. At Cardno ATC, every client counts - large and small - national and local.

Over the last three decades, Cardno ATC has seamlessly and discreetly worked behind the scenes for hundreds of Fortune 500 companies and government agencies across the US, helping them manage and respond to environmental, occupational health and safety, and construction-related issues. Today we continue to serve as a one-stop resource for leaders in petroleum, real estate, retail, manufacturing, financial services, insurance, construction, telecommunications, education, government and hospitality.

#### **Professional Access 24/7**

Cardno ATC gives you continuous access to a diverse group of qualified professionals. Our staff, located in major cities throughout the US, offer a network of environmental, geotechnical, materials and structural engineers, as well as industrial hygienists, chemists, ecologists, roofing professionals, architects and certified inspectors and technicians.

#### **A National Resource Network**

The diversity of our services builds on the knowledge base of our staff, and our national reach extends through our multidisciplinary offices. When your project requires expertise or specialty outside the scope of Cardno ATC's services, we can bring the professionals you need to the table through our pre-established relationships. Wherever your project is

located, Cardno ATC can mobilize a one-stop solution team within hours, deliver a consistent level of superior performance, meet or exceed your project timetable, deliver clear, concise data and reports, and provide a positive outcome for your project.

#### **Environmental Management**

Reducing negative impact on our environment is everyone's concern. Cardno ATC offers local and national expertise to manage the environmental requirements related to every phase of your business, effectively and cost-efficiently. Whether you're conducting due diligence for a real estate project, hazardous materials remediation, trying to obtain LEED certification, meeting sustainability initiatives, or seeking to resolve governmental compliance issues, Cardno ATC partners with you to conquer any environmental challenge you may face.

#### **Industrial Hygiene and Occupational Health**

In today's business climate, it is essential to incorporate health and safety programs into daily operations not only for the safety and welfare of employees, but also governmental compliance, litigation risk reduction and cost reduction. Since 1982, Cardno ATC has been a leader in the delivery of comprehensive Industrial Hygiene health and safety services that help businesses evaluate, improve

and protect the health and safety of people in the workplace. Cardno ATC works with you to achieve potent solutions for projects related to asbestos consulting and management, disaster response, healthcare infection control risk management, indoor air quality assessments, lead-based paint consulting and management, and OSHA compliance audits.

### **Geotechnical Engineering**

Cardno ATC achieves your subsurface condition and geotechnical goals through all feasibility/planning, design development, construction and post-construction phases. You will have 24/7 access to a diverse group of one-stop resources – geotechnical engineers, LEED-accredited professionals, materials engineers, roofing professionals and certified engineering technicians. Those resources are complemented by full-service AASHTO Certified Laboratories, a fleet of all-terrain and truck-mounted drill rigs and exploration equipment to evaluate soil and rock conditions.

### **Construction Materials Testing and Inspection**

Cardno ATC provides systematic testing and inspection services to assure that your construction materials meet project specifications and sustainability goals. Whether your project is simple or complex,

Cardno ATC has the QA/QC expertise to meet your needs. We work with architects, engineers, owners, general contractors and participants throughout each phase of the project – from feasibility/planning, design development, construction and fabrication and post-construction operations. Our services can save significant money by preventing change orders during construction and reducing future maintenance and repair cost. These services may be conducted in the laboratory, fabricating plant or at your construction site.

### **Government Services**

As an approved GSA provider, Cardno ATC has helped Contract Administrators, Contracting Officer Representatives, Directors of Public Works and Procurement Managers for over 25 years. We have a long history working for government agencies, and since we're on the Environmental Services schedule, engaging our services saves you even more time. Our GSA contract allows any Federal agency to expedite contracting procedures by negotiating directly with Cardno ATC's experts. Our qualifications, services, and rates are already pre-approved by the General Services Administration.

### **Environmental, Health and Safety Training**

We deliver results-driven Environmental, Health & Safety training programs across the nation and around the world. The Environmental Institute (TEI), a division of Cardno ATC, began one of the nation's first training and information programs for asbestos in 1988. Today, TEI continues to set the standard, with flexible pricing, courses available 24/7 and online and CD. Additionally, we offer the adaptability to run sessions from a client's location. TEI also operates federal and state accredited training centers, located in Georgia, Maryland, Massachusetts, Vermont, Albany and New York City.

What sets TEI apart is our ability to track complex and ever-changing regulations and translate them into effective programs. As your training resource, we'll teach you how to properly identify, assess and mitigate environmental hazards while you earn certification maintenance credits. With TEI it's easy to find the solution that meets your needs.

### How it All Began

Cardno ATC was founded in 1982 in Sioux Falls, SD as an analytical laboratory. The company's initial services included water quality analysis, lake restoration and general analytical testing. Readily adapting to an evolving market, Cardno ATC began conducting asbestos analyses and air monitoring services, creating a new direction for the growing company. Driven by contractor and clients' requests, Cardno ATC continued to expand its reach and opened several offices nationwide including New York City, Denver, Lincoln, Omaha, Detroit, St. Louis, Kansas City and Los Angeles. During the 1990s, our geographic influence and our ability to serve a diversified client base increased exponentially with the addition of more service lines. Cardno ATC also acquired more than 10 companies and 50 additional offices nationwide.

Today with more than 71 offices in 39 states, Cardno ATC generates more than \$200 million in services annually and employs over 1,600 professional, technical and support personnel nationwide.

With 90 percent of our business generated from client referrals, it's no surprise why Cardno ATC consistently ranks among *Engineering News-Record's* top consultants nationwide.

"We appreciate your company's continuous outstanding performance on Turner projects related to geotechnical engineering and construction materials testing services. Your performance to date has been exceptional and the personnel placed in the field are highly qualified, punctual and responsive to our needs."

**Turner Properties Inc.**

"Your instructors were very knowledgeable and professional and had excellent reviews from the facilities, plus you were able to meet an ever-fluctuating training schedule."

**United States Postal Services**
